EDUCATION

Istanbul Technical University <i>Electronics and Communication Engineering</i>	Istanbul, Turkey <i>Graduated 2023</i>
Istanbul Technical University <i>Electrical Engineering, Double Degree</i>	Istanbul, Turkey <i>Graduated 2023</i>

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Bash, C, Shell Scripting
Backend: Django, Django REST Framework, Nginx, PostgreSQL, SQLite
Frontend: React, HTML5, CSS3, Bootstrap
Cloud & DevOps: AWS, Terraform, Docker, Docker Compose, GitHub Actions, CI/CD, Linux, Git
Libraries & Tools: Pandas, NumPy, OpenCV, PyTorch

PROJECTS

BookClub | Goodreads-inspired Full-Stack Web Application

GitHub Live Demo	2025 – Present
- Designed and developed a production-grade Goodreads-inspired full-stack web application with automated cloud infrastructure and CI/CD using Django, React, PostgreSQL, Docker, Terraform, and AWS. - Designed a normalized PostgreSQL schema and implemented an ETL pipeline that cleaned, transformed, and imported over 52,000 book records from raw CSV datasets. - Developed RESTful APIs supporting authentication, reviews, books, authors, genres, user profiles, and custom reading lists. - Containerized the application using Docker and Docker Compose, configuring Gunicorn and Nginx for production deployment. - Provisioned AWS infrastructure using Terraform and implemented a GitHub Actions CI/CD pipeline to automate deployments to EC2 with Docker, ECR, Application Load Balancer, S3, and CloudFront.	

EXPERIENCE

Independent Software Development	2023 – Present
Transitioned into software engineering through self-directed learning while building production-grade software projects and earning cloud certifications.	
ITU SMART Lab	2022 – 2023
<i>Istanbul Technical University</i>	<i>Istanbul, Turkey</i>
- Developed a pedestrian detection pipeline using the CARLA Simulator and NVIDIA Jetson platform for autonomous driving research. - Generated simulation scenarios, processed image data, and integrated computer vision models for real-time inference. - Collaborated with researchers to evaluate and improve perception system performance.	
Satellite Systems Intern	Jul 2018 - Aug 2018
<i>Aselsan</i>	<i>Ankara, Turkey</i>
- Supported testing and validation of power electronics systems designed for satellite applications. - Participated in environmental and reliability testing of electronic components under extreme operating conditions.	

CERTIFICATIONS

AWS Certified Solutions Architect – Associate	Amazon Web Services
DevOps with Docker	University of Helsinki
CS50 Web Programming with Python and JavaScript	Harvard University
CS50's Introduction to Programming with Python	Harvard University
CS50's Introduction to Computer Science	Harvard University
